OBJECTIVE

Aspiring Software Developer/Data Analyst with hands-on experience in Python, SQL, Power BI, and web development. Built real world applications and data-driven projects with a strong focus on problem-solving, analytics, and scalable solutions.

SKILLS

- Programming: Python, Java, SQL
- Data & Analytics: Power BI, Pandas, NumPy, Excel
- Visualization: Matplotlib, Seaborn, Plotly
- Soft Skills: Problem Solving, Communication

INTERESTS

- Building small applications and exploring new technologies
- Fitness training and maintaining gym discipline
- Playing football and team sports
- Reading business and self-improvement books
- Participating in quiz competitions and knowledge-based challenges

LANGUAGE

- English – Proficient
- Hindi – Native/Fluent
- Marathi – Fluent

ACTIVITIES

- Participated in inter-college group discussions and technical events

EXPERIENCE

Plexus pvt. Ltd.

Python/Data Analyst Intern

Nov 2025 - Dec 2025

- Developed DataVisionX, an AI-powered data analytics web application for automated Exploratory Data Analysis (EDA).
- Performed data cleaning, analysis, and manipulation using Python, Pandas, and NumPy.
- Created interactive visualizations using Seaborn, Matplotlib, and Plotly to identify patterns and correlations.
- Gained hands-on experience in data visualization, analytical thinking, and real-world data handling.

EDUCATION

Sadguru Gadage Maharaj College

Bachelor of Computer Application (BCA)

2026

CGPA: 9.0 / 10

PROJECTS

Store Expense tracker (Financial Management System)

- Developed a multi-store financial management system to track income, expenses, assets, and liabilities.
 - Implemented profit & loss calculations with bar and pie chart reports.
- Tech: Python, SQLite, PyQt5

Club & Committee Management System

- Built a web platform to manage college clubs and events, allowing students to explore clubs and submit join requests.
 - Developed backend functionality using Flask and integrated SQLite for storing club event, and user request data.
 - Designed a responsive UI to improve accessibility across devices and enhance user experience.
- Tech: Flask, Python, HTML, CSS, JavaScript, SQLite

DataVisionX

- Developed DataVisionX, an AI-powered EDA web application for automated data analysis and visualization.
 - Enabled dataset upload, missing value detection, data quality checks, and interactive charts.
 - Generated actionable insights with exportable reports to support data-driven decisions.
- Tech: Python, Pandas, NumPy, Plotly, Streamlit

ACHIEVEMENTS & AWARDS

- Secured 1st Rank in College-Level Quiz Competition (2025, Sadguru Gadage Maharaj College)
- Secured 2nd Rank in Web Development Competition (2026, Sadguru Gadage Maharaj College)

CERTIFICATION

- python internship certificate- plexus pvt Ltd
- Power Bi -Udemy
- Deloitte Data Analytics Job Simulation – Certificate of Completion
